

Refrigeration Mechanic

Valley Refrigeration & Air Conditioning Ltd. is looking to hire a team oriented, top-performing Refrigeration Journeyman.

Responsibilities:

Install, service and repair commercial and industrial refrigeration, air conditioning units, and combined heating, ventilation & cooling systems, and residential heating and cooling systems

Troubleshoot onsite mechanical issues

Perform routine maintenance, service and warranty work

Interact with customers

Follow safe work practices

Document work performed on service orders

Other duties as required to meet customer/business needs

Requirements:

Possession of a valid Class 5 driver's license with a good abstract

Own hand tools, tool pouch and steel toe safety boots

Ability to travel on a daily basis within the service area, with some travel to outer lying regions as necessary (a company vehicle and gas card will be provided)

Ability to work a flexible schedule, with an on-call rotation to cover after-hour business calls

At Valley we are pleased to offer a competitive and comprehensive total compensation package.

The job is physically demanding and involves occasional heavy lifting, crouching, bending and working on roof-tops and with materials such as industrial glues, refrigerant and electrical components.

Possessing your Gasfitter ticket would be an asset

Benefits:

Room for growth within the company

Training provided

Health benefits
